**Heat and Mass Transfer Serving Society**

The heat and mass transfer community is involved in nearly all aspects of society since nearly all activities involve some form of heat or mass transfer. Heat and mass transfer phenomena control energy production, production lines, transportation systems and numerous activities for our modern lifestyles. Thus, heat and mass transfer is a vitally important field where engineers face difficult challenges developing cutting-edge technologies for highly efficient energy systems, massive information/ communication equipment, high-value-added manufacturing, and comfortable living environments, to name just a few.

The International Heat Transfer Conferences (IHTC) are the world's premier conferences for scientists and engineers in the heat and mass transfer research community. The conferences are convened every four years to exchange the latest heat and mass transfer information. Previous conferences have greatly enhanced our exchanges of knowledge and experience and nurtured new and interdisciplinary research areas. IHTC-16 will continue the increasingly important mission of fostering international cooperation and the exchange of ideas among colleagues to solve urgent problems and improve peoples' lives in the years ahead.

We invite forward-looking scientists, engineers, and researchers from all over the world to attend the 16th International Heat Transfer Conference (IHTC-16) in Beijing, China, August 10 to 15, 2018. In addition to exploring traditional research areas, IHTC-16 will ask important questions about how we can better serve society and make this world a better place for all people. We face major issues such as ensuring

sustainable development, healthy ageing, sufficient food for all, and economic growth that need scientific and technological solutions. To do this, we need to promote collaboration to develop new ideas with interdisciplinary teams developing new solutions for today's problems.

IHTC-16 will provide participants with unique opportunities for exchanging new ideas and will facilitate extensive discussions throughout the conference. We hope that IHTC-16 will magnify the contributions of the previous 15 meetings for the benefit of the international heat and mass transfer community and all people.

The organizing committee is planning on 4 plenary lectures, more than 30 keynote lectures and more than 1000 poster presentations from all over the world.

## Awards

The following memorial awards/medals will be awarded during IHTC-16 with their lectures:

The William Begell Medal  
The Max Jakob Memorial Award  
The Luikov Medal  
The Nukiyama Memorial Award

## Paper Submission

Abstracts for IHTC-16 should be submitted to [submission.ihtcdigitallibrary.com](http://submission.ihtcdigitallibrary.com). The abstracts will be initially reviewed by the regional International Scientific Committee (ISC) members. Upon acceptance, full-length manuscripts will be submitted and reviewed by reviewers assigned by the regional ISC members. **The manuscripts should be 6-8 pages long.** The final manuscripts with appropriate modifications will then be submitted with the copyright transfer form and one author's registration by April 30, 2018 to ensure that the manuscript is included in the proceedings. All the regular presentations will be in poster sessions.

## Important Dates

~~Abstract submission deadline: August 31, 2017~~

**Abstract submission deadline: September 15, 2017**

Notification of abstract acceptance: October 15, 2017

Submission of full length paper for review:

December 15, 2017

Notification of full paper acceptance: March 15, 2018

Final paper submission deadline: April 30, 2018

Copyright form submission deadline: April 30, 2018

Author registration due: April 30, 2018 (for papers to be included in the proceedings)

Advanced registration deadline: June 30, 2018

Online registration deadline: July 25, 2018

## IHTC Digital Library (IDL)

The AIHTC and Begell House have established the IHTC Digital Library (IDL), an online archival library

with an interactive web interface and an advanced search engine. The Library includes all past and future Proceedings of the International Heat Transfer Conferences. All the papers presented at IHTC-16 will be uploaded into the library.
